Francesca De Laurentis

FULL STACK DEVELOPER

About me

Enthusiastic person, looking for my first working experience in the tech industry.

Always been fascinated about technology, over last year became very passionate about coding, finding in it a field where to express my analytical mindset and problem solving attitude.

My background in customer service has taught me the importance of empathy and attention to detail, which I've combined with my coding skills in order to deliver accessible and user friendly apps.

Always willing to learn and eager to undertake new challenges in order to improve my knowledge and skills.

Tech Stack

HTML5/CSS3
Javascript ES6
React

PostgreSQL
Node.js
Express

Tape
Supertest
Jest

Command Line Debugging
Accessibility
Agile Methodology
Wire-framing&Prototyping
Heroku/Netlify
Travis CI

Experience

FOUNDERS & CODERS

18 week full-stack JavaScript programme | July 2019 - Present

Pair programming throughout the course allowed me to:

- Improve my programming knowledge and learn qualities from other whilst working as a pair
- Develop the ability to successfully communicate to others improving my skills both in communication as well as team player

Projects

TECH FOR BETTER | *MY BODY BACK*

Tech stack: React, Airtable | **Role:** UX/UI & Developer

An app containing self-help material to support people who have experienced sexual assault and encourage them to go for a routine cervical screening.

- Created and maintained a CSS style guide
- Managed to organise a considerable amount of content using swipeable and tappable functionality and replacing content with videos and audios
- Used React transition

STUDENT PROJECT | *NOM NOM*

Tech stack: Express, Handlebars, PostgreSQL | **Role:** DevOps & Developer

Built a meal planning app that recommends week-long meal plans with common ingredients and provides healthy options in order to reduce food waste.

- Set up the architecture of the project and tech stack using controllers, views and model
- Responsible for continuous integration with Travis and deployment on Heroku
